

BASALTINA MOVE 6

BETONELLA®
L'autentica. Dal 1979

SPECIFICATION

Double-layer concrete paving blocks, 60 mm thick, supplied in 5 pieces, with a rectangular layout and the following nominal dimensions:

97.5 x 195 mm, 146.25 x 195 mm, 195 x 195 mm, 243.75 x 195 mm, and 292.5 x 195 mm. The blocks of different sizes are supplied pre-sorted in packs ready for delivery. The edge of the upper face is sharp and runs straight along its entire perimeter. This, combined with the presence of non-through spacers on the four lateral faces, 2 mm thick, ensures constant and accentuated equidistance of the joints between adjacent blocks at the walking surface.

The upper face¹ has a smooth surface, particularly suitable for paving sidewalks and areas for bicycles, pedestrians, wheelchairs, and trolleys.

Basaltina Move 6 is available in numerous colors and can be installed using the "opera incerto" method. The intrinsic and performance characteristics must comply with UNI EN 1339 standards.
