

BASALTINA PARK 8

BETONELLA®
L'autentica. Dal 1979

SPECIFICATION

Paving made of double-layer concrete blocks, 80 mm thick, supplied in four rectangular pieces with nominal dimensions of 104 x 208 mm, 130 x 208 mm, 208 x 208 mm, and 312 x 208 mm. Different-sized blocks are supplied pre-sorted in packs ready for delivery. The top surface has a sharp edge and runs straight along its entire perimeter. This, combined with the 2 mm thick non-through spacers on the four lateral faces, ensures consistent and even spacing of the joints between adjacent blocks at the walking surface.

The top surface has an orange peel surface with 1-2 mm irregularly shaped recesses that give it a rustic look reminiscent of split stone.

The intrinsic and performance characteristics must comply with the UNI EN 1338 standards.

The manufacturer must ensure compliance with the quality characteristics required by the standards with a production system audit and a quality management system compliant with the UNI EN 9001:2015 standards, both certified by an accredited body.
